This works as expected:

 $\mbox{\content} - AAAA$

Test is FALSE. Parameter BBBB has length 4

Test is TRUE. Parameter AAAA has length 4

Test is TRUE. Parameter AAAA has length 4

But what about with this: ???

\lastname - AAAA

 $\lceil 2 \rceil$ - Record 2

\lastname[5] - Record 5

\lastname[25] - AAAA

Test AAAA = AAAA is TRUE. Parameter 1 = AAAA has length 4

Test BBBB = AAAA is FALSE. Parameter 2 = BBBB has length 4

Test AAAA = AAAA is FALSE. Parameter 1 = AAAA has length 13

Test AAAA = AAAA is FALSE. Parameter 2 = AAAA length 9
