Here is begin of processing...
name: ME – lowercase name: me
address: STREET – upercase address: STREET
0000 HERE

name: You – lowercase name: you
address: Square – upercase address: SQUARE
9999 There

name: we – lowercase name: we
address: another Square – upercase address: ANOTHER SQUARE

111 anyplace

And here is end....

And now we can use internal hooks:

Here is begin of processing...

ME	STREET	0000	HERE
You	Square	9999	There
we	another Square	111	anyplace

And here is end....

Printing only specific data:

You	Square	9999	There

Simpletablelineaction:

1	ME	STREET	0000	HERE
2	You	Square	9999	There
3	we	another Square	111	anyplace

Another using of hooks:

Here is all CSV file:

Here is new 1. line of CSV file:
ME, **STREET**, **0000**, **HERE**,

Here is new 2. line of CSV file:
You, **Square**, **9999**, **There**,

Here is new 3. line of CSV file:
we, **another Square**, **111**, **anyplace**,

Here is end of file processing
